The auditor should not consider the Supplement to be “safe harbor” for identifying audit procedures to apply in a particular engagement, but the auditor should be prepared to justify departures from the suggested procedures. The auditor can consider the supplement a “safe harbor” for identification of compliance requirements to be tested if the auditor performs reasonable procedures to ensure that the requirements in the Supplement are current. The grantor agency may elect to review audit working papers to determine that audit tests are adequate.

The Single Audit Compliance Unit of the External Audit Branch reviews all single audits, financial audits, and management letters of all “grantees.” We are looking at both the presentation (information as to program, pass-through and state funding, NCDOT identification numbers) and the dollar amounts presented versus our records. Any reports not received will be requested.

Grants must be properly identified by program name (“Rail Industrial Access”), DOT number (“DOT-23”), and WBS number on the Schedule of Financial Assistance. This information is available from the agreement with NCDOT; program name is in the second/third paragraph while the WBS number is on the upper right hand corner of the first page. Grantor and/or pass-through grantor, program title and CFDA number (if appropriate) should also be included. Please do not combine like projects into one dollar amount since we would need to call you for the breakdown; please report award amount, Federal pass-through, State share and local share. On NCDOT’s confirmation from the Grant Master List (GML), these moneys are shown as DOT number “DOT-23.”
I. PROGRAM OBJECTIVES

The Rail Industrial Access Program is intended to attract new industry to the state. NCDOT will help fund the cost of constructing rail tracks required to serve a new business or a business expansion. The program provides funds to construct or improve railroad access (spur) tracks and related facilities. The Short Line Infrastructure Assistance Grant Program (SIAP) is a part of the Rail Industrial Access Program. The SIAP provides funds to short line railroad to rehabilitate and modernize track and bridge infrastructure.

II. PROGRAM PROCEDURES

Local governments, community development organizations, railroad companies and industries may apply for Rail Industrial Access funds. The Rail Division of NCDOT reviews applications and makes funding recommendations to the North Carolina Board of Transportation. Short line and regional railroads are eligible to apply for to the SIAP. The Rail Division and SIAP review committee reviews applications and makes funding recommendations to the North Carolina Board of Transportation. A grant agreement between the department and the recipient is prepared and executed. Project purchases are to be competitive and contracts must be awarded to the low bidder. All procurements are to be conducted in accordance with N.C. General Statute 143-129. To receive reimbursement, the RIAP recipient must submit a payment invoice after the project is completed and after the track is in revenue service. SIAP recipients may submit progressive payment invoices. Upon review and approval by the Rail Division and DOT Fiscal Office, payment will be made.
