Brief Description of Program: The Non-Field Farm Roads Program was created in the aftermath of Hurricane Matthew and Tropical Storms Hermine and Julia as part of the NC Disaster Recovery Act of 2016 (S.L. 2016-124). The intent of the program is to complement USDA funding to repair farm roads affected by the major storm events in 2016 that are not considered part of an agricultural field, and thus ineligible for USDA assistance. Funding in S.L. 2016-124 was supplemented with additional funding through S.L. 2017-119.

Organizations Funded: Private Local Government Both

Source of Funds: State Federal _____
