Memorandum #1099

May 19, 2008

TO: Municipal Officials and Certified Public Accountants

FROM: Sharon Edmundson, Director
Fiscal Management Section

SUBJECT: Management of Cash and Taxes and Fund Balance Available – Municipalities
For the Fiscal Year ended June 30, 2007

This publication provides comparative cash and investment, fund balance, and tax levy information of municipal governments for the fiscal year ended June 30, 2007. As in the past, we have added the county assessment-to-sales ratios and have calculated effective tax rates for each municipality. (Note: the effective tax rate is calculated by multiplying the unit-wide tax rate by the assessment-to-sales ratio.) Providing the effective tax rates should result in a better comparison of tax rates between municipalities, given those municipalities are at different points on their revaluation cycles. The average tax rates are calculated on a dollar-weighted basis. In addition, the dollar-weighted average unit-wide effective tax rates for the last five fiscal years are presented. The statistics provide a range of highest and lowest items within a grouping and the mathematical average. Tax collection percentages and average tax collection percentages are presented for all property, all property other than motor vehicles, and motor vehicles only.

The municipalities in this report have been segregated into one of two groups: municipalities with electrical systems or municipalities without electrical systems. Both groups are further segregated into the population groups noted below. The statistics provide the detail of the highest and the lowest items within a grouping and the mathematical average. The Average Tax Collection percentages are based upon an average weighted by the total tax levy. This analysis presents statistical information for the State as a whole and the following population groupings: 50,000 and above; 10,000 to 49,999; 2,500 to 9,999; 1,000 to 2,499; 500 to 999; and 499 and below.

Municipal officials are encouraged to compare their own performances to similar municipalities and to statewide averages. Such comparisons may identify opportunities for improvement or may indicate improved performances from previous fiscal years. For those municipalities with below average tax collection percentages, collection procedures should be reviewed to determine if more effective means of collection are available. An improvement in tax collection percentages provides numerous benefits to municipalities. It provides more revenues to finance programs, generates additional funds for the investment program, and allows the property tax rate to be lower than it would otherwise have to be. Section 50, "Tax Assessment, Billing, and Collection" in the North Carolina Department of State Treasurer Policies Manual, provides information on collection procedures. This section is available on our Web site at www.nctreasurer.com, under the state and local government link, then the auditing and reporting line. Please contact Ms. Lisa Olson, 919-807-2382, if you need to order a hard copy of this section. Also, the Institute of Government at the University of North Carolina at Chapel Hill offers courses in tax collection that may benefit tax collectors in carrying out their statutory responsibilities.

Given the role assumed by the counties in billing and collecting motor vehicle taxes, local officials should strongly consider consolidating the property tax functions of counties and municipalities. Again Section 50, "Tax Assessment, Billing, and Collection," contains a discussion on consolidated property tax functions. In addition, Memorandum #692, Consolidating County and Municipal Property Tax Functions and Memorandum #929, Results of Municipal and County Survey on Consolidating and Billing of Tax Functions, which discuss joint arrangements utilized by many counties and municipalities, are available from our office. Consolidating the property tax functions should provide more economical use of equipment, office personnel, supplies, and postage. A single tax billing and collection office would simplify taxpayers' efforts to pay and inquire about the status of their taxes. Also, especially for smaller units, a consolidated office should be able to enforce tax collections (attachment and garnishment, levy and foreclosure) at a lower cost. Of course, the most effective arrangement assumes that the municipal and county officials will have a cooperative arrangement.

The statewide and population grouping tax collection percentages over the last five fiscal years are as follows:

Average Tax Collection Percentages

<u>Population Grouping</u>	<u>2002-03</u>	<u>2003-04</u>	<u>2004-05</u>	<u>2005-06</u>	<u>2006-07</u>
Statewide - All Units	97.10%	97.37%	97.41%	97.51%	97.59
Units With Electrical Systems:					
All with electric	96.27	96.52	96.95	96.77	96.78
50,000 and Above	96.52	96.81	97.12	97.16	97.21
10,000 to 49,999	96.37	96.52	97.05	96.63	96.32
2,500 to 9,999	95.16	95.21	95.85	95.48	96.44
1,000 to 2,499	90.61	90.56	92.66	93.16	93.80
500 to 999	95.95	97.04	96.55	96.64	97.89
499 and Below	90.46	93.24	92.79	90.53	90.55
Units Without Electrical Systems:					
All without electric	97.31	97.59	97.53	97.71	97.80
50,000 and Above	97.82	98.01	97.83	98.14	98.23
10,000 to 49,999	96.54	96.79	97.36	97.50	97.26
2,500 to 9,999	96.46	96.91	97.00	97.01	96.99
1,000 to 2,499	96.23	96.59	96.85	96.61	96.79
500 to 999	94.10	96.09	96.08	95.97	96.20
499 and Below	97.59	98.11	93.30	89.11	96.62

For municipalities, the statewide tax collection percentage improved slightly in 2006-07. The high tax collection percentages over the last five fiscal years are a good indicator of the quality of municipal financial management; however in some individual cases there is still room for improvement.

A factor which might adversely affect a municipality's collection rate is the treatment of taxes collected by the county by June 30th, but not remitted to the municipality until after June 30th. Since these taxes have been received by the municipality's agent for collecting taxes, the county, these funds can be

counted as collected during the fiscal year. These collections should be reclassified from taxes receivable to an amount due from other governments. Any current collections would be included in the calculation of the current year's tax collection rate.

Average 2006-2007 Tax Collection Percentages

<u>Population Grouping</u>	<u>Excluding Motor Vehicles</u>	<u>Motor Vehicles</u>
Statewide - All Units	98.59	86.56
Units With Electrical Systems:		
All with electric	98.08	84.30
50,000 and Above	98.50	85.07
10,000 to 49,999	97.63	83.66
2,500 to 9,999	97.72	82.79
1,000 to 2,499	95.81	81.38
500 to 999	98.65	83.29
499 and Below	94.37	73.08
Units Without Electrical Systems:		
All without electric	98.72	87.25
50,000 and Above	99.09	88.31
10,000 to 49,999	98.34	86.37
2,500 to 9,999	97.96	85.29
1,000 to 2,499	97.85	83.01
500 to 999	97.26	80.88
499 and Below	97.33	80.81

For the 2006-2007 fiscal year we continue to report collection rates for motor vehicles and property other than motor vehicles separately. These figures are included in the report because the methods of billing and collecting taxes differ between motor vehicles and other classes of property. The same trend noted for all property is noted for all property other than motor vehicles. Tax collection percentages for municipalities vary according to population, with the largest municipalities having the highest tax collection percentages. This trend is generally true for motor vehicle taxes, but the trend is not as strong. A strong correlation between population and motor vehicle tax collection rates was noted among counties.

For the 2006-2007 fiscal year collections for titled vehicles are collected under the staggered system. Taxes are due upon a titled vehicle on the first day of the fourth month after the vehicle is registered. Therefore, taxes levied on vehicles registered during April, May and June of a fiscal year are not due until the subsequent fiscal year. These taxes should not be included in the current year's levy or in calculating the percentage of that levy collected for financial reporting purposes.

In the past, tax collectors from those municipalities and counties that had the higher collection percentages for motor vehicles have indicated that they send out multiple late notices for vehicle taxes. Some of those local governments also aggressively attached the assets and garnished the wages of a delinquent taxpayer. Units that rely solely upon the block upon subsequent year registrations placed with the Division of Motor Vehicles should eventually collect a high percentage of motor vehicle taxes, but their current year collection percentages of motor vehicle taxes will probably be lower.

The report provides dollar weighted tax rate averages for all five fiscal years presented below. The statewide and population grouping statistics on the unit-wide property tax rates over the last five fiscal years are as follows:

<u>Population Grouping</u>	Average Unit-Wide Tax Rates (per \$100)				
	<u>2002-03</u>	<u>2003-04</u>	<u>2004-05</u>	<u>2005-06</u>	<u>2006-07</u>

499 and Below	0.3249	0.3240	0.3181	0.3049	0.3655

The table on the next page shows the effective tax rates. The effective tax rate equals the property tax levy divided by the estimated market value of assessed property. The averages in the following table are also dollar weighted. Beginning in 2002-03, the larger municipalities began experiencing an increase in this average, which continued until 2006-07, when rates declined in almost every population group. Stated tax rates increased on average for 2006-07, having decreased the previous two years.

Average Unit-Wide Effective Tax Rates (per \$100)

Using the actual dollars in the tax levy when determining average rates clarifies the relationship between population and tax rates. With the exception of the smallest units, a trend can be found between population and both tax rates and effective tax rates for the past five fiscal years. Groups with higher populations generally have higher tax rates, the exceptions being the groups with and without electric systems and populations 499 and under and 2,500 and 9,999. The 499 and below groups have tax rates above the next higher population groups. The comparatively small number of municipalities making up some of the population groups with electric systems may make those population groups more susceptible to statistical variations. While the averages provide general trend data, there may be substantial variation among individual units within population groups. A consistent trend for tax rates is that for most municipalities the tax rate is lower in the fiscal years immediately following revaluation. Tax rates usually increase as a municipality moves through the revaluation cycle, reaching a peak immediately before revaluation. The effective tax rate is more stable as it is adjusted for actual real estate sales compared to assessed values.

Each year the staff of the Local Government Commission analyzes the financial statements of cities and counties to determine the amount of fund balance available for appropriation in the General Fund, and the amount of fund balance available for appropriation as a percentage of prior year expenditures. These numbers are significant because the property tax is a major source of revenue in the General Fund. The majority of property tax revenues are received in the latter months of the calendar year. Therefore, there should be reserves on hand in the form of fund balance available for appropriation at June 30th to prevent the unit from experiencing cash flow difficulties during the first two quarters of the next fiscal year. The minimum level of fund balance available for appropriation that should be on hand to enable the unit to meet current obligations and to prevent the unit from experiencing cash flow difficulties is 8% of the prior year's expenditures.

In addition to the 8% needed to prevent cash flow difficulties, units also maintain fund balance available for appropriation in the General Fund in case unforeseen needs or opportunities should arise. Fund balance available for appropriation at June 30th is a source that may be budgeted in the following year to

address these situations. There is not an established minimum amount that should be in reserve for these purposes. The officials of the individual units should make that determination. The amount of fund balance available for appropriation maintained by a particular unit would be influenced by such factors as the size of the unit, economic conditions within the unit, future capital outlay needs, stability of revenue sources, and susceptibility of the unit to natural disasters.

The staff sends letters to units if the amount of fund balance available for appropriation as a percentage of prior year expenditures in the General Fund falls below 8%. The staff also compares the percentage of fund balance available for appropriation to the prior year percentages for similar units. If that percentage is materially below the average of similar units, the staff will send a letter to alert the unit of this fact. Units will be encouraged to evaluate the amounts in reserves and determine if the level is adequate.

The chart below shows the average percentage of fund balance available for appropriation for similarly grouped counties and cities for the fiscal year ended June 30, 2007. Officials should use these figures to compare their unit to similar units and evaluate the adequacy of their unit's current reserves.

The table below shows averages for fund balance available, expenditures and average fund balance available as a percentage of average annual expenditures.

by Size	Average 2006-2007 Fund Balance	Average Balance As a Percentage of Average Expenditures
Cities – no electric		
All	\$2,223,943	37.19
50,000 or more	38,017,286	23.01
10,000 to 49,999	6,588,922	40.29
2,500 to 9,999	2,302,791	65.39
1,000 to 2,499	951,714	66.98
500 to 999	583,698	99.01
Under 500	305,288	117.46
Cities – electric		
All	\$3,937,996	33.80
50,000 or more	20,897,865	28.48
10,000 to 49,999	6,402,237	37.06
2,500 to 9,999	1,790,035	38.53
1,000 to 2,499	924,717	73.84
500 to 999	774,696	71.50
Under 500	212,157	118.56

The statistics presented in this report were gathered from various sources. The investment earnings, cash and investments, tax collection rates, and uncollected tax amounts were compiled from the 2007 Annual Financial Information Reports (LGC-37 or AFIR) submitted to the Department of State Treasurer. In some cases this information was obtained from the municipality's audited financial statements. The fund balance available data was taken from the audited financial statements. The assessed valuation, tax rate, and last year of revaluation for each municipality were compiled from data obtained from the Department

Memorandum #1099

May 20, 2008

Page 7

of Revenue. The NC Department of Revenue calculates the assessment-to-sales ratios annually for each county. This ratio is based on a sample of selected real estate transactions within a municipality and equals the assessed valuation divided by the actual sales price. The ratio of the dominant county of the municipality is used as the municipality's ratio. The municipality populations were provided by the Office of State Budget and Management and are estimates as of July 1, 2006 adjusted for end-of-the-year boundary changes. The tax rate equivalents and effective tax rates were calculated by the staff of the Department of State Treasurer. All data included in this report are the most recently available information. If you have any questions concerning this memorandum, please contact George Harris at (919) 807-2387.

Explanation of Column Headings:

- (1) Amounts are net of unexpended debt proceeds and interest earned thereon.
- (2) Last year in which all real property was appraised; revaluation was effective on January 1 of that year. Counties are required to revalue property at a minimum of every eight years. The year shown for next scheduled general revaluation is the year reported by the county in July, 2006.
- (3) Assessed valuation is based on real property values that were determined as of January 1 in the year of revaluation. This number is adjusted annually for discoveries, abatements, improvements, and any other changes that materially affect real property values. Assessed valuation also includes personal property, which is valued annually on a calendar year basis and titled motor vehicles which are valued as of January 1 preceding the date a new vehicle registration is applied for or a current vehicle registration is renewed.
- (4) When "NA" appears:
 - (a) in the "Tax Rate Equiv - Invest Earnings Amt", "Latest Yr/Next Yr of Reval", "January 1, 2006 Assessed Valuation", and "Tax Rate" columns, the municipality did not levy an ad valorem tax.
 - (b) in the "Tax Rate Equiv - 2006-07 Amount Uncoll" column, the calculation is not possible because data is not available.
- (5) "NR" indicates that the AFIR was not received, therefore data was not available.
- (6) * Indicates that the AFIR was not received, but cash, investment earnings, collection percentages, and uncollected amount were available from the audit report.
