Brief Description of Program:

Funds are awarded through a competitive Request for Application process to community agencies for the purpose of establishing/maintaining school health centers that are school-based, or school-linked.

The goals of the Program are:

1. To improve the health of older children and their readiness to learn by providing accessible preventative services through school-based and school-linked health centers that are planned and developed through community collaborations.
2. To provide comprehensive and coordinated school health services and programs that address health challenges and risks prevalent in school-aged youth, ages 10 to 19; and
3. To provide school-centered services and programs in collaboration with community-based organizations and systems of care.

Brief Description of Program:

The Division disburses receipt funds to each local health department as required in NCGS 130A-248(d) on an annual basis for support of local food, lodging, and institutions permitting and inspection programs. Funding is based upon program inspection compliance percentages and base rate. Funds may be utilized by the local health departments to administer state regulation activities related to state authorized agent performance of food, lodging, and institutional sanitation inspection activities. Such activities include educating staff, salary adjustments, computer hardware/software, clerical support, audiovisual aids and equipment, technical journal subscriptions, reference books, and necessary technical equipment related to food, lodging and institutional sanitation programs.

Brief Description of Program:

This program expands adoption opportunities for some of North Carolina's children for whom no suitable North Carolina family can be located. The county agencies work with specialized adoption agencies throughout the country that locate adoptive families that serve special needs children. These agencies base their fees on the actual average cost of the total services, which range from \$6,000 to \$13,000 or more per child. The maximum amount available to counties from the State for a child is \$1,800. The county agency must provide the amount that exceeds the State's allowable limit.

Phone Number 919-527-6337

Brief Description of Program:

This program provides adoption assistance to certain children with special needs following entry of a Decree of Adoption. To qualify, these children must be in the placement responsibility of a North Carolina licensed private adoption agency or had been in the placement responsibility of a North Carolina licensed private adoption agency and meet all other adoption assistance eligibility requirements. Payments must be no greater than the foster care board rate. In addition, vendor payments for medical and non-medical specialized services may be provided up to \$2,400 per year.

Effective October 1, 2011 10A NCAC 70M .0403 was amended to include: "No monthly cash assistance payments from the State Fund for Adoptive Children with Special Needs shall be made for any adoption in which the Decree of Adoption is issued on or after October 1, 2011." All adoption assistance agreements signed prior to October 1, 2011 remain in effect.

Division of Aging**

<u>Agency Contact Person - Program</u>	<u>Agency Contact Person - Financial</u>
Leslee Breen 919) 855-3414 leslee.breen@dhhs.nc.gov	Herlene Thomas (919) 855-3400 herlene.thomas@dhhs.nc.gov

Brief Description of Program:

Give a brief description of program including allowable activities:

For fiscal year FY25 \$1,265,316 authorized to award existing senior centers and developing programs with operational funding. Funding can be used for any purpose that supports the ongoing operation or development of the senior center. A developing senior center refers to the temporary status of a newly established center that is working towards becoming a multipurpose center or a satellite center within three years of its initial designation as a developing center.

If a developing center does not achieve status as a multipurpose center or satellite center after three years, General Purpose Funding is terminated. The Division of Aging allocates funding to area agencies on aging to make an award to designated senior centers. Awards to senior centers require 25% local matching.

rachel.durbin@dhhs.nc.gov

Brief Description of Program: The State Traumatic Brain Injury (TBI) program funds are used to assist individuals with traumatic brain injury to receive the necessary support to remain in their communities. These individuals, once identified by the local authority as consumers in need of assistance, have access to program funds. Examples of what funds are used for are as follows: equipment/devices, behavioral supports, in-home supports, community supports, transportation, residential support, etc. The funds are used as a provider of last resort above and beyond what other funding sources may cover. These funds are also available when an individual is not eligible for any other funding source. Additional program needs identified may allow local authorities, other agencies and providers of service to people with traumatic brain injury to develop programs to meet specific needs. These funds are also used for funding other traumatic brain injury-related initiatives to improve the State and local service systems in identifying and increasing support and service to individuals with traumatic brain injury.

Organizations Funded: ☐ Private ☐ Local Government ☒ Both

Contract exists between DMH/DD/SAS and The Brain Injury Association of NC to carry out activities and programs identified as important in improving the quality of life for individuals with traumatic brain injury. Funds are disbursed to LME/MCOs on an availability basis for specific client requests.

Division of Adult Correction and Juvenile Justice**

<u>Agency Contact Person - Program</u>	<u>Agency Contact Person - Financial</u>
Angela P. Smith Director Juvenile Facility Operations 919-324-6478	Tara Williams-Brown Controller 919-324-1409

Brief Description of Program:

I. PROGRAM OBJECTIVES

In accordance with North Carolina General Statutes 143B-820, State Subsidy to County Detention Facilities, the Section shall administer a State subsidy program to pay a county that provides juvenile detention services and meets State standards a certain per diem per juvenile. In general, this per diem should be fifty percent (50%) of the total cost of caring for a juvenile from within the county and one hundred percent (100%) of the total cost of caring for a juvenile from another county. Any county placing a juvenile in a detention facility in another county shall pay fifty percent (50%) of the total cost of caring for the juvenile to the Section. The per diem rate is set at \$244 per juvenile, per day.

II. PROGRAM PROCEDURES

The five (5) counties that provide juvenile detention services are Durham, Guilford, Mecklenburg, Madison and Brunswick. The Durham County-operated facility, the Guilford County-operated facility and the Mecklenburg County-operated facility submit invoices to Juvenile Justice/Detention Services section by the 10th of each month. The invoices are reviewed for any errors in the number of days a juvenile was detained and the county responsible for the bill. The Madison County-operated facility and the Brunswick County-operated facility submit invoices to Juvenile Justice/Detention Services section by the 10th of each month for utilization exceeding the minimum number of beds provided pursuant to respective agreements. The invoices are reviewed for any errors in the number of days a juvenile was detained and the county responsible for the bill, as well as against the terms of the Memos of Agreement.

13. Sub-Recipient Monitoring
NC-JOIN is a program/system and is the sub-recipient monitoring tool used to enter juveniles as they enter DPS Juvenile Detention Centers, Youth Development Centers, or any other applicable treatment program. Admissions and releases, as well as other vital information concerning juveniles, are entered into NC-JOIN. This enables those individuals authorized to use the program access to any information that is vital to the placement of a juvenile.
14. Special Tests and Provisions:
 - a) Verify that checks received from DPS are for actual resident days [Durham, Guilford, Mecklenburg Counties], or meet the terms of the Memo of Agreement [Madison and Brunswick Counties].
 - b) Does the amount of check received balance to the amount invoiced?
 - c) Test actual data from NC-JOIN to the facility data (verify names and dates), and from NCALLIES to the Madison and Brunswick Counties MOA's.
 - d) Verify the amount billed reconciles to the approved rate for the facility.

Herlene Thomas
(919) 855-3400
herlene.thomas@dhhs.nc.gov

Brief Description of Program:

Project C.A.R.E. (Caregiver Alternatives to Running on Empy) provides critical comprehensive support, including respite care vouchers, to vulnerable unpaid family caregivers of individuals living with Alzheimer's disease or other related dementia (ADRD). The program effectively reaches isolated rural and minority communities through culturally sensitive outreach strategies with a unique family-centered, in-home intervention. Project C.A.R.E. aims to minimize State expenses and maximize the family's potential to provide the most appropriate, high quality and cost-effective care in the least restrictive setting thus delaying or preventing the need for institutionalization.

Project C.A.R.E. contracts with six community-based organizations to provide care consultation services in all 100 counties. Family consultants collaborate closely with the sixteen Area Agencies on Aging (AAA) and the Family Caregiver Support Program. This relationship allows for available resources to be coordinated and leveraged for maximum impact. Family consultants provide support directly to caregivers of persons living with ADRD by:

1. Offering care consultation services: dementia-specific information, caregiver assessments and individualized care plans, caregiver education and connections to social support networks,
2. Linking families with available community resources to address unmet needs including local support groups, supportive services, entitlement programs and other community resources,
3. Partnering with each AAA through its Family Caregiver Support Program to provide outreach, training and education,
4. Providing caregivers consumer-directed respite care vouchers (\$500 each) whereby the caregiver decides who, when and where to hire help,
5. Providing training and assistance to AAAs and the community-at-large to increase capacity to assist persons with dementia and their families and
6. Enhancing partnerships with and among the various entities serving persons living with ADRD and assisting their care partners.

The total annual budget for Project C.A.R.E. is \$1,033,333. Six organizations are awarded funds to provide Project C.A.R.E. regionally and one entity to financially manage the respite voucher awards.

The primary objectives of the Construction Training Partnership (CTP or the Program)) are to:

- 1) provide basic, yet broad-scoped, construction training to unemployed and/or underemployed individuals;
- 2) upon completion of training, provide job placement services which result in students being employed within the construction field, and earning a living wage;
- 3) increase the number of skilled construction workers available for hire within the regions where CTP training is provided; and,
- 4) to facilitate the rehabilitation or new construction of "affordable" housing which, while serving as field laboratories for CTP training classes, also benefits low-income homeowners and/or renters.

Agency provided CTP funds may be used only for the hard costs of eligible program-related new construction or rehabilitation activities. Eligible hard costs are: 1) the cost of building materials and supplies used or consumed; 2) the cost of subcontracted trades, 3) the reasonable costs associated with the short-term rental of specialty tools; and 4) the reasonable cost of contractor profit and overhead.

Phone Number: 919-527-6447

Brief Description of Program:

The Medication Assistance Program (MAP) is a safety net for uninsured, low-income individuals in the state. Participating in Free and Charitable Clinics, Community Health Centers, and Rural Health Centers provide access to free and low-cost medication through pharmaceutical company programs for low income, uninsured patients who cannot afford them. This service, currently offered through 102 sites uses special software, which matches patients' eligibility with available free medications.

Grantees of this program shall use all funds awarded to support the MAP, specifically:

- Assist all low-income citizens with identifying their optimal prescription drug coverage options through public and private programs and then provide direct assistance in obtaining medication using the special software. Grantees must specify a dispensing plan that will ensure their patients will receive the medications that are procured on their behalf.
- Collaborate closely with local public and private health care providers including pharmacists, primary care physicians, health departments, hospitals, senior centers, Area Agencies on Aging, and local SHIP coordinators to ensure the success of their efforts

In addition, the grantee may also work with Medicare eligible seniors to:

- Identify their optimal Medicare Part D coverage option
- Access public or private prescription assistance programs to cover gaps in Medicare Part D (e.g. coverage gap)
- Apply for any available public or private prescription assistance programs for seniors who do not enroll for Part D

URGENT REPAIR PROGRAM

State Authorization: **GS122E**

NORTH CAROLINA HOUSING FINANCE AGENCY

Agency Contact Person - Program

Sarah Zinn
Rehabilitation Officer
919-578-3580
sdzinn@nchfa.com

Agency Contact Person - Financial

Taylor Davies
Controller
919-875-3761
tkdavies@nchfa.com

Brief Description of Program:

The goals of the Urgent Repair Program ("URP") are: 1) to alleviate housing conditions which pose an imminent threat to the life or safety of very low and low-income homeowners with special needs; and 2) to provide accessibility modifications and other repairs necessary to prevent displacement of very low and low-income homeowners with special needs, such as frail elderly and persons with disabilities. It is an objective of the URP to serve households with urgent repair needs which cannot be met through other state- or federally-funded housing assistance programs.

Program funds may be used for three purposes only: 1) "Hard costs" (materials, labor, etc.) associated with repairs or modifications of eligible dwelling units; 2) "program support" costs for activities ancillary to the rehabilitation work (inspections, work write-ups, cost estimates, etc.); and 3) "Administrative" costs for necessary and documented administrative costs. More specific definitions of these cost categories are provided in the Program Guidelines at section 2.1, "Eligible Uses of Funds" ("PG 2.1"). Definitions vary slightly by funding cycle.

Unless specifically funded for disaster assistance ("URP-D"), recipients must limit hard costs and soft cost to a maximum of \$15,000 per dwelling unit. Recipients may set more stringent limits, in their adopted Assistance Policies, than program limits.

Program support costs are limited, on a unit-by-unit basis, based on the amount of hard costs. Under URP94, that maximum was 10% of hard costs. Since URP97, a tiered approach has been used with levels of program support maximums based on ranges of hard costs. See P.G. 2.1.8 for soft cost details and P.G. 2.1.10 for administrative details.

Brief Description of Program:

Funding under this award is critical to ensuring the safe transportation of hazardous materials by training emergency responders and funding planning activities such as commodity flow studies, tabletop exercises and emergency response plan development. PHMSA's training goal is to ensure that responders who receive training under the grant will have the ability to protect nearby persons, property, and the environment from the effects of accidents or incidents involving the transportation of hazardous materials. PHMSA's goal for planning activities is to develop, improve, and carry out emergency plans under the Emergency Planning and Community Right-To-Know Act of 1986 ([42 U.S.C. 11001 et seq.](#)), including ascertaining flow patterns of hazardous material transportation movement.

HMEP funding is awarded to states in a 3-year grant award cycle. NCEM is awarded HMEP funding on behalf of the state of NC from PHMSA. NCEM passes through HMEP funding to subrecipients including local governments, Local Emergency Planning Committees (LEPCs), and state agencies for approved HMEP activities.

Brief Description of Program:

The purpose of this program is to provide funding to centers for victims of sexual assault and to The North Carolina Coalition Against Sexual Assault, Inc. The sexual assault/rape crisis center shall be a nonprofit corporation or a local government entity.

The General Assembly appropriates funds each fiscal year for operation of the Sexual Assault/Rape Crisis Centers throughout the State that offer basic core services including hotline services, transportation, community education programs, daytime services, call forwarding during the night, rape crisis services, advocacy (legal, medical, court), and referrals. The centers are responsible for operating each center per the program guidelines provided.

Program funds may be expended for costs incurred in providing direct services to victims of sexual assault through counseling, intervention, and community education programs. These functions must be performed on a continual basis. All funds must be expended as budgeted. They include but are not limited to staffing, training of staff and volunteers, travel, printing, supplies, rent, utilities, communications, transportation, and shelter operation costs and room charges. Contracts entered for consultant services require prior written approval by the grant administrators. All line-item transfers must receive prior written approval.

Grant funds may not be expended for loans; mortgage payments; taxes; entertainment costs; social activities; alcoholic beverages; flowers; debt payments, fines, and penalties; cost of lobbying to influence legislators to support or vote for or against legislation; or any cost/expenditure not included in the approved budget.

Brief Description of Program:

The purpose of this program is to encourage appropriate ceremonies and activities throughout the state relating to the observance of the legal holiday honoring Martin Luther King, Jr.'s birthday, to provide advice and assistance to local governments and private organizations across the state with respect to the observance of such holiday, and to promote among the people of North Carolina an awareness and appreciation of the life and work of Martin Luther King, Jr.

To apply for grant funds, each prospective recipient must submit an application in response to the annual Request for Proposal (RFP). All applications are received and reviewed by a committee consisting of members of the Martin Luther King, Jr. Commission.

The Commission determines the organizations that will receive awards and the amount of each award.

Each requesting agency/organization must address elements of the RFP, presenting the objective of their project, scope of work, budget and outcomes. After the Commission recommends awards, the recipient organization is notified of its successful application and amount of funding.

The Department of Administration (DOA) assists the Commission in developing contractual documents that are signed by the grantee and approved by DOA's Office of Fiscal Management and Secretary. The contract includes the name and address of the grantee, federal identification number, statement of work and budget. After DOA approval, funds are advanced to these organizations.

Funds must be expended to comply with the criteria specified in the work plan. Expenditures usually include staffing, office supplies and education/outreach activities associated with disseminating information about the life and legacy of Dr. Martin Luther King, Jr., as well as commemorating his birthday.

Brief Description of Program:

This program is designed to help communities develop and implement strategies for improving health care access for rural residents. Technical assistance and limited financial resources are provided to underserved communities to develop, expand and maintain rural health centers. The objective of the Rural Health Centers Operational Grant Program is to make quality primary care services available and accessible to residents of rural underserved areas that have previously experienced an insufficiency of such services. Operational funding is provided through the Primary Care Access Plan (PCAP), Behavioral Health Plan (BH) to help offset the cost of providing primary care medical services and limited integrated behavioral health services to uninsured residents in the rural health care center's service area. In addition, it provides Operational funding for planning and implementation to promote financial stability as well as moving rural health centers towards a Patient Centered Medical Home model of care.

Samantha.Radel@dhhs.nc.gov

Brief Description of Program:

Purpose: The Injury and Violence Prevention Branch (IVPB) mission is to promote and protect the health and well-being of all people in North Carolina by preventing injury and violence. As part of the overall mission to prevent sexual violence in North Carolina, the IVPB receives and administers federal funds for the Rape Prevention and Education (RPE) Program. Funds are awarded to local agencies and organizations to provide prevention-oriented education and training in local communities. Funds are awarded to the North Carolina Coalition against Sexual Assault (NCCASA) to provide training, technical assistance, and tools to support local agencies/organizations in their prevention activities.

The Rape Prevention and Education Program is administered by the Centers for Disease Control and Prevention (CDC). Federal legislation specifies the major areas of allowable activities that are aimed at preventing rape and sexual assault, and the CDC has set program priorities and provided guidance to all states and territories for implementing the program. CDC expects all RPE programs at both the state and local levels to use a public health approach; to undertake planning, including an assessment of community needs and assets; to perform program evaluation; and to focus on primary prevention – preventing initial sexual violence perpetration and victimization.

Agencies Funded: Community based organizations and local rape crisis centers. Services Provided by Agencies: Federal Funds are to be used for sexual violence program implementation in local school settings, provide bystander intervention, and community mobilization.

Monitoring: Agencies participate on monthly calls; submit monthly expenditure reports; and mid-term and end of the contract year reports to report expenditures, activities and outcomes to the Program Supervisor.

Samantha.Radel@dhhs.nc.gov

Brief Description of Program:

This grant supports enhanced surveillance capacity at the state level to prevent and eliminate childhood lead poisoning, and to use surveillance data to identify the highest risk areas and implement appropriate population-based interventions. Examples of such interventions include enforcement of housing and health codes and public and health care provider education campaigns. Data may also be used to designate areas as 'lead safe' and qualify applicants to apply for a universal blood lead testing waiver through Medicaid. Surveillance data is also used to evaluate the timeliness and efficacy of case management of children identified with high blood lead levels.

This grant was acquired through a competitive application process submitted through the grants.gov website. The Centers for Disease Control and Prevention (CDC) awarded North Carolina \$568,678 beginning September 30, 2024, for the fourth year of a five-year project period. This project is 100% federally funded and has no matching or maintenance of effort requirements. The one subrecipient, UNC Chapel Hill Institute for the Environment (\$115,695), was selected based on necessary technical skills (e.g., health education and grant coordination expertise) and was approved by the CDC through the application review process. The portion of the grant transferred to UNC is by contract reimbursement. Performance requirements and measures are communicated to the UNC through the contracting process. Deliverables are monitored by site visits and required reports. Grant awards may not be expended for research, medical care and treatment, or for environmental remediation of lead sources. Funds may be used only for reasonable program purposes, including personnel, travel, supplies, and services.

Samantha Radel Chief Budget Officer (919) 623-3312
Samantha.Radel@dhhs.nc.gov

Brief Description of Program:

The Injury and Violence Prevention Branch (IVPB) mission is to promote and protect the health and well-being of all people in North Carolina by preventing injury and violence. In 2011 the Branch was awarded funding from the Centers for Disease Control and Prevention to implement the Core Violence and Injury Prevention Program (CORE VIPP).

The overall purpose of the program is to assist State Health Departments (SHDs) to build and/or maintain effective delivery systems for dissemination, implementation and evaluation of best practice programs and policies. This includes support for general capacity building of SHDs and their local partners, as well as strategy specific capacity building for the implementation of direct best practice interventions (older adult falls and child injury). In addition, this program supports SHDs in their efforts towards integration or the strategic alignment of resources for meaningful change.

Base Component (BASE): This component will provide support to SHDs to develop and strengthen their injury and violence prevention programs by increasing general capacity in key areas identified as core components of SHD injury and violence prevention programs. Additional focus will be placed on traumatic brain injury and falls prevention activities focused on seniors.

Regional Network Coordinating Organization (RNCO): Resources and capacity for injury and violence prevention and control are limited and vary by state. Systematic efforts are needed to share information and best practices and make it available to all potential users. A regional network of states encourages the creation, sharing and effective application of knowledge to address injury and violence prevention and control within all states. The purpose of the regional network coordinating organization is to collaborate across and between states to build capacity, share best practices and scientific evidence and increase injury and violence prevention capacity through the regional network to prevent and reduce injury and violence.

Enhance Supplement (ENHANCED): This component will provide support to community coalitions to build capacity through the implementation of public health actions to prevent injury in disproportionately affected communities. This supplemental funding will focus on providing training on community-level factors that reinforce Adverse Childhood Experiences, AKA ACES, as well as provide community coalitions with training and technical assistance to implement strategies that promote injury and violence prevention.

Agencies Funded: State universities.

Services Provided by Agencies: Federal Funds are to be used for injury and violence prevention program implementation in community and policy settings.

Monitoring: Agencies participate on monthly calls; submit monthly expenditure reports; and mid-term and end of the contract year reports to report expenditures, activities and outcomes to the Program Supervisor.

Brief Description of Program:

The purpose of the Healthy Beginnings Program is to fund projects in various communities to impact the reduction of minority infant mortality and preterm and low birthweight births to improve minority birth outcomes. Funds are given to local health departments and private non-profit organizations to support local community-based minority infant mortality reduction efforts.

In 1994, the North Carolina General Assembly appropriated \$750,000 annually to fund fifteen projects that would demonstrate means to lower infant mortality and low birth weight rates among minority populations. Funding decreased in 2001 to \$700,000 to fund 14 projects. In 2009, funds from the Targeted Infant Mortality Reduction Program (TIMR) were merged with Healthy Beginnings. In FY2024-2025, Healthy Beginnings received an additional \$129,830 in funding. The goal of the Healthy Beginnings Program is to address the two-fold plus disparity between white and minority infant mortality in the State of North Carolina by targeting areas with significant minority infant mortality. A community-based approach addressing infant mortality was mandated with a specific focus on the formulation and implementation of innovative strategies to improve birth outcomes and involvement from a variety of community organizations.

Community and faith-based organizations and local health departments with experience working in minority communities are eligible to apply for Healthy Beginnings funding.

Funded recipients are expected to implement programs that will impact the reduction of minority infant mortality and low birthweight births in their communities and thereby improve minority birth outcomes. Funding is available for 3 years, contingent upon the availability of funds and performance. In FY2024-2025 there are 10 sites funded at an award level of \$86,861 to \$92,983 annually.

Brief Description of Program:

Temporary Assistance for Needy Families (TANF) Block Grant funds are distributed in accordance with the TANF Block Grant Plan approved by the North Carolina General Assembly. These TANF funds are used to support local pregnancy prevention project activity. The allocation of TANF for TPPI, as well as, State appropriation expended for similar purposes, is administered by the Women, Infant, and Community Wellness Section, Division of Public Health, North Carolina Department of Health and Human Services, 1929 Mail Service Center, Raleigh, North Carolina 27699-1929, (919) 707-5700. A request for applications process is undertaken to identify projects seeking funding for a four-year period. Following an objective review of proposals, the North Carolina Department of Health and Human Services makes a final decision. Following project selection, each agency is expected to meet goals established in the project plan as well as in-kind matching and reporting requirements, as explained in the legislation and service contract. Periodic site visits are made by program staff to assure that the appropriate focus on project goals is maintained. Data is collected from active projects and used in program evaluation. [G.S. 130A-131.15A (a)-(g)].

Brief Description of Program:

The local child fatality prevention teams (CFPTs) were legislatively established in 1993 and there are teams in all 100 counties. It is the responsibility of the Local Health Departments to assure these teams are operational. The mission of the local teams is to review the deaths of children, ages 0-17, that are not due to suspected abuse and neglect and about which no report for abuse or neglect had been made to the county department of social services within the previous 12 months. The local CFPTs review those child deaths due to homicide, suicide, fires, illness, prematurity and perinatal cause, among others, to search for ways to prevent child deaths.

Brief Description of Program:

The purpose of the Care Management for High-Risk Pregnancies Program (CMHRP) funding for Individuals Ineligible for Medicaid is to provide specialized prenatal and postpartum care management services to individuals who are pregnant, economically marginalized and ineligible for Medicaid. The goal of CMHRP services is to prevent adverse pregnancy outcomes and improve birth outcomes, with a particular focus on reducing the rate of preterm birth.

Many individuals who are pregnant in North Carolina enter pregnancy with medical and psychosocial risk factors that affect their health and the health of their infants. CMHRP Services consist of interventions provided by a nurse or a social worker, during and after pregnancy, to increase access to needed medical, education, and social services, and address the factors that impact poor maternal and infant health outcomes, including infant mortality. Care management services include assessment, intervention, referrals, and coordination of care. Additional information on the specific program requirements can be found in the Division of Health Benefits Program Guide for Management of High-Risk Pregnancies and At-Risk Children in Managed Care.

Sally.Herndon@dhhs.nc.gov

Samantha Radel
Chief Budget Officer
(919) 623-3312
samantha.radel@dhhs.nc.gov

Brief Description of Program:

The Tobacco Prevention and Control Branch (TPCB) collaborates with and builds capacity of partners, including State and local agencies, local health departments and community organizations, to plan and implement culturally appropriate evidence-based strategies to reduce deaths and health problems due to tobacco use and secondhand smoke (SHS). TPCB's four major goal areas are to: 1) Eliminate exposure to SHS, 2) Promote tobacco use cessation among adults and youth, 3) Prevent initiation of tobacco use among youth and young adults, and 4) Identify and eliminate tobacco-related disparities.

CDC funds must be used for focused strategies to change systems, develop and implement policies, change the environment in which tobacco use occurs, and impact population groups rather than individuals. Other appropriate uses of funding include:

- Staff salaries, wages and fringe benefits
- Consultant and subcontractor fees and expenses
- Educational and promotional materials
- Education of community leaders and decision makers
- Convening interested groups
- Policy analysis
- Media and marketing costs
- Data acquisition expenses (e.g., database purchase, survey costs) must be approved by TPCB
- Computer and printer

-
- Printing
 - Office supplies
 - Travel in State
 - TPCB approved travel to national conferences

If a local health department has other sources of tobacco prevention and control support, the health department may not use CDC money to duplicate funding for the same activities or supplant existing funds. Some health departments may be required to include indirect costs in their budgets.

The local health department must have on site the Potential Conflict of Interest and Disclosure Form regarding acceptance of funds from tobacco-related entities and the Health Department Tobacco Use Policy. Any changes in these policies must be reported to the TPCB.

Brief Description of Program:

NSGP provides funding support for target hardening and other physical security enhancements to non-profit organizations that are at high risk of a terrorist. The program seeks to integrate the preparedness activities of non-profit organizations that are at high risk of a terrorist attack with broader state and local preparedness efforts. NSGP also serves to promote emergency preparedness coordination and collaboration activities between public and private community representatives as well as state and local government agencies. There are three NSGP funding sources appropriated for nonprofit organizations: 1) NSGP - Urban Area (NSGP-UA) funds nonprofit organizations located within certain Urban Area Security Initiative (UASI)- designated urban areas; The Charlotte, NC area is currently the only UASI-designated urban area in the state for NSGP-UA; and 2) NSGP - State (NSGP-S) where each state receives a target allocation for nonprofit organizations located outside of UASI designated urban areas. The NSGP – NSS-S and NSGP – NSS-UA are supplemental to the 2024 NSGP Program.

Brief Description of Program:

[EMPG](#) provides federal funding to assist state, local, tribal & territorial emergency management agencies to implement the [National Preparedness System](#) (NPS) and support the National Preparedness Goal of a secure and resilient nation. EMPG's allowable costs support efforts to build and sustain core capabilities to address certain specified national and regional priority areas. At its root, EMPG provides funds to sustain and enhance all-hazards emergency management capabilities. NCEM recognizes that a statewide comprehensive emergency management program begins at the local level; that is why NCEM coordinates EMPG activities through all 100 counties and Eastern Band of Cherokee Indians (EBCI) across the state. Counties & EBCI are required to provide a dollar-for-dollar non-federal cost-share/ match as a condition of their award. For example, if a county is sub-awarded

\$50,000 of federal EMPG funding, they must expend at least that same amount in county funds, either cash or in-kind, for their approved EMPG projects/activities. Counties are required to properly complete 8 approved universal activities and at least 6 approved optional activities to receive maximum funding. See [Emergency Management Performance Grant \(EMPG\) | NC DPS](#) for details.

Reporting Manager
984-236-0082

Brief Description of Program:

The Family Violence Prevention and Services Program administers the Family Violence Prevention and Services Act (FVPSA), the primary federal funding stream dedicated to the support of emergency shelter and related assistance for victims of domestic violence and their children.

FVPSA Core is a primary federal grant funding stream for local domestic violence programs to provide core services, including crisis response, safe housing, advocacy, counseling, legal assistance, safety planning, and comprehensive support.

Specifically, FVPSA Core's statutory purposes per 42 U.S.C. § 10401(b) are to:

- (1) assist States and Indian tribes in efforts to increase public awareness about, and primary and secondary prevention of, family violence, domestic violence, and dating violence; and
- (2) assist States and Indian tribes in efforts to provide immediate shelter and supportive services for victims of family violence, domestic violence, or dating violence, and their dependents.

Family Violence Prevention & Services Grant

The federal cognizant agency is the U.S. Department of Health and Human Services Administration for Children and Families. The NC Council for Women and Youth Involvement applies for North Carolina's formula allocation through an annual application process.

The federal funds are allocated to sub-grant recipients (non-profit and governmental entities) based on a funding formula that assesses population data, number of people served, and fiscal and programmatic grant compliance. The award process includes a grant application review and compliance assessment prior to formal award notification being sent to sub-grant recipients.

Funds are disbursed based on a reimbursement process once each sub-grant recipient completes and enters into a contract agreement with the NC Council for Women and Youth Involvement. The contract period varies depending on the funding stream.

All grant awards are contingent upon the NC Council for Women and Youth Involvement receiving the specified grant funds from the U.S. Department of Health and Human Services. Eligible applicants that become grantees are required to submit monthly reimbursement reports and semi-annual statistical reports that provide accountability for the Family Violence Prevention and Services Act funds.

Use of funds is covered by 42 U.S.C. § 10408(b):

(1) Funds awarded to eligible entities under subsection (a) shall be used to provide shelter, supportive services, or prevention services to adult and youth victims of family violence, domestic violence, or dating violence, and their dependents, which may include—

- (A) provision, on a regular basis, of immediate shelter and related supportive services to adult and youth victims of family violence, domestic violence, or dating violence, and their dependents, including paying for the operating and administrative expenses of the facilities for such shelter;
- (B) assistance in developing safety plans, and supporting efforts of victims of family violence, domestic violence, or dating violence to make decisions related to their ongoing safety and well-being;
- (C) provision of individual and group counseling, peer support groups, and referral to community-based services to assist family violence, domestic violence, and dating violence victims, and their dependents, in recovering from the effects of the violence;
- (D) provision of services, training, technical assistance, and outreach to increase awareness of family violence, domestic violence, and dating violence and increase the accessibility of family violence, domestic violence, and dating violence services;
- (E) provision of culturally and linguistically appropriate services;
- (F) provision of services for children exposed to family violence, domestic violence, or dating violence, including age-appropriate counseling, supportive services, and services for the non-abusing parent that support that parent's role as a caregiver, which may, as appropriate, include services that work with the non-abusing parent and child together;
- (G) provision of advocacy, case management services, and information and referral services, concerning issues related to family violence, domestic violence, or dating violence intervention and prevention, including—
 - (i) assistance in accessing related Federal and State financial assistance programs;
 - (ii) legal advocacy to assist victims and their dependents;

Family Violence Prevention & Services Grant

(iii) medical advocacy, including provision of referrals for appropriate health care services (including mental health, alcohol, and drug abuse treatment), but which shall not include reimbursement for any health care services;

(iv) assistance locating and securing safe and affordable permanent housing and homelessness prevention services;

(v) provision of transportation, childcare, respite care, job training and employment services, financial literacy services and education, financial planning, and related economic empowerment services; and

(vi) parenting and other educational services for victims and their dependents; and

(H) prevention services, including outreach to underserved populations.

Grant funds provided under FVPSA cannot be used for direct payments to any client/victim or dependent of a client/victim. Federal funds made available to a State or Indian tribe under this program shall be used to supplement and not supplant other Federal, State, tribal, and local public funds expended to provide services and activities that promote the objectives of this program.

All existing FVPSA Core grantees are eligible for additional FVPSA ARPA Supplemental funds to continue efforts to prepare, prevent, and respond to COVID-19. Within those parameters, grantees have flexibility to determine which services best support the needs of children and families experiencing family violence, domestic violence, and dating violence. These funds are available through September 2025.

ARPA allocated funding to the Secretary of Health and Human Services to detect, diagnose, trace, monitor, and mitigate COVID-19. In July 2021, the Secretary authorized FVPSA to receive a portion of that funding to assist states, territories, and tribes with providing access to COVID-29 testing and vaccines for domestic violence shelters and programs. The purpose of these funds is to prevent, prepare for, and respond to COVID-19 with an intentional focus on increasing support for domestic violence survivors. Within those parameters, grantees have flexibility to determine which services best support the needs of survivors, children, and families experiencing family violence, domestic violence, and dating violence. These funds are available through September 2025.

The Consolidated Appropriations Act of 2023 included disaster recovery funds for FVPSA federal award recipients to provide temporary housing and assistance for domestic violence survivors including alteration, renovation, and construction of damaged or destroyed property and facilities following Hurricanes Fiona and Ian. These funds remain available through September 2027.

Brief Description of Program:

The General Assembly of the State of North Carolina authorizes funding to certain Visitor Centers (NCGS 20-79.7(c)(2) revised) located within rest area sites or at stand-alone sites, for the purpose of providing visitor information to the traveling public. The Visitor Center Agreements specify the activities allowed and unallowed. Funding may only be used for allowable operational costs and in accordance with the cost principles and uniform administrative requirements defined in the OMB Uniform Guidance, 2 CFR 200, and/or state policies. Each Visitor Center Funding agreement specifies the activities allowed to be funded under the program.

The program is administered by the North Carolina Department of Transportation, hereinafter referred to as the Department. Recipients are nonprofit organizations or local governments appointed by the State Legislature. The recipients receive an allocation of \$92,857 annually from the Special Registration Plate fund with an additional \$50,000 from the Highway Fund (with the exception of the McDowell Visitor Center and the visitor center in Transylvania County which receives an annual allocation of \$25,000 from the Highway Fund, and Tabor City, in Columbus County, Fair Bluff in Columbus County, Randolph County – two visitor centers, and Wilkes County, which does not receive an allocation from the Highway Fund at this time).

On NCDOT's confirmation Grant Master List (GML), the Visitor Centers' program disbursements are identified as State No.: DOT-13

Title: Administrative Assistant II
Phone Number: 919-693-2483

Brief Description of Program:

The New and Emerging Crops Program (NECP) identifies potential new crops, products, and agricultural enterprises and provides the agricultural research, marketing support, and grower education necessary to make those crops or products profitable for North Carolina growers. It has three components: market exploration, field research and grower education.

Research ideas and proposals for new and emerging crops will be solicited from growers, marketing and scientific researchers and industry representatives. Initial field research may occur on one or more of North Carolina's 18 agricultural research stations to determine if a new crop is appropriate for a particular climate or soil type. For value added products, research may occur in a laboratory setting. The third component of the New and Emerging Crops Program is grower education. Those who decide to grow a crop or produce a new value-added product will be provided the assistance in growing and marketing the crop or product.

NECP will serve as a valuable resource for N.C. growers looking to diversify into new crops, products and enterprises. Expanded production knowledge for new crops as well as additional marketing opportunities will keep farm operations profitable and sustainable, provide an economic stimulus to rural North Carolina and position North Carolina to continue as a leader in the agricultural industry.

Samantha.Radel@dhhs.nc.gov

Brief Description of Program:

The purpose of the Infant Mortality in Communities now known as the Reducing Infant Mortality in Communities (RIMC) program is to provide funds to local health departments to implement evidence-based programs in the counties that have experienced the highest infant mortality disparity ratios and infant mortality rates during the five-year period of 2016-2020.

In the state fiscal year 2015-2016, the North Carolina General Assembly appropriated one million five hundred and seventy-five thousand dollars (\$1,575,000) in the Maternal and Child Health Block Grant Plan to the Department of Health and Human Services' (DHHS) Division of Public Health (DPH) for each year of the 2015-2017 fiscal biennium to be used for evidence-based programs in North Carolina counties with the highest infant mortality rates. These funds continue to be re-appropriated.

Local health departments are required to implement at least two evidence-based strategies that are proven to lower infant mortality rates. The evidence-based strategies are the following: breastfeeding support services, Centering Pregnancy model of group prenatal care, doula services, infant safe sleep services; and preconception and interconception health services. The selected strategies have all proven to be an effective means to improve birth outcomes through addressing pregnancy intendedness, preterm birth, and/or infant death.

Funding is available for 3 years, contingent upon the availability of funds and performance. In FY2024-2025, there are 8 local health departments funded at an award level of \$152,307 to \$253,302.

Brief Description of Program:

This program provides grants to assist States in operating statewide vocational rehabilitation (VR) programs, each of which is an integral part of a statewide workforce development system. The VR program is designed to provide VR services for individuals with disabilities, consistent with their strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice, so that they may prepare for and engage in competitive integrated employment and achieve economic self-sufficiency. Eligible individuals are those who have a physical or mental impairment that results in a substantial impediment to employment, who can benefit from VR services for employment, and who require VR services. Priority must be given to serving individuals with the most significant disabilities if a state is unable to serve all eligible individuals.

Brief Description of Program:

Grants will be awarded based on their relevancy to the powers and duties outlined in NC General Statute § 20-7.6. "Awarding grants-in-aid to non-profit entities to conduct education and awareness activities on organ and tissue donation and advance care planning." Grants will be considered for but are not limited to the following areas as they relate to the purposes stated above:

- Implementing general education and community outreach.
- Targeting education to multicultural populations.
- Supporting partnerships committed to organizational and community change.
- Collaborating between agencies and organizations that develop statewide initiatives for change.
- Networking with other foundations, trusts, and commissions to enhance the overall outcomes of this funding.

Types of eligible non-profit entities might include but are not limited to Organ Procurement Organizations, Tissue Banks, Eye Banks, Coalitions on Donation, Advance Care Planning and End-of-Life Organizations, Schools, Colleges and Universities, Civic Organizations, Faith Communities, Museums and Libraries.

The process for applicants requesting grants-in-aid is done in three phases: Letter of Intent; Full Application & Agreement and Release of Funds.

After the final selection is made, each grant recipient must execute a State of North Carolina Contract before receiving the approved amount of grants-in-aid.

Expenditures or outlays from state grant funds shall not exceed the budgeted amounts for each line item or for the total grant. Allowable costs are Personnel, Travel, Supplies, Equipment, Advertising, Printing, Copying and Postage, Other cost such as Accounting, SWIPE to Donate app, Communications and Public Outreach Software Services.

Brief Description of Program:

The Bicycle Helmet Initiative provides helmets to eligible government and non-profit organizations in an effort to reduce head-related injuries to children while riding their bicycles. Helmets are awarded and distributed once per calendar year in the spring and awardees have the remainder of the calendar year to host their helmet distribution event, which emphasizes bicycle safety practices through education. A committee reviews and determines if applicants are eligible to receive helmets. Priority is given to organizations that try to distribute helmets to low-income children, who are the most vulnerable to head-related injuries from bicycles. The applicants are required to file a report about the distribution event within 30 days after the event occurs or at the end of the year.

The Integrated Mobility Division will solicit bids from helmet vendors every 3 years. One vendor will be selected. The helmet vendor is required to ship helmets directly to the recipients after IMD has made award selections. Organizations are required to have a commercial address in order to receive the shipment of helmets. PO boxes and residential address are not allowed by vendors. The vendor is responsible for sending the correct number of helmets and correlating sizes to each awarded organization.

Brief Description of Program:

The Public Access program was established to fund access projects including:

- Access projects that assist in attracting new industry or expanding industry
- Public school bus drives, including driveways and stabilization of bus parking
- Access roads to public airports and medical facilities
- Driveways for rural fire district and rescue squad facilities, includes driveway access to bays (new or expansion)

The program is administered by the North Carolina Department of Transportation (NCDOT). NCDOT state forces or NCDOT-appointed contractors are not completing the work, eligible recipients of the funds are local governments appointed by the State Legislatures. Funding is limited to \$50,000 per public school site, \$25,000 per Fire Department & Rescue Squad driveway project, or \$1,000 per employee for Industrial access project for a new or expanding industry (up to \$250,000 maximum per industrial project unless waived by the Secretary of Transportation).

Brief Description of Program:

The Travelers' Aid program provides public transportation assistance through the use of intercity bus and/or light transit vehicles for disadvantaged individuals, citizens experiencing a major-medical crisis, job loss, homelessness, those escaping domestic violence or sexual assault, or impacted by emergency circumstances who are in need of transportation to other locations in times of distress.

Subrecipients of Travelers' Aid funds support a network of human service providers committed to assisting individuals and families who are in transition, crisis and are disconnected from their normal support systems. Travelers' Aid program partners consist of a diverse group of human service non-profit organizations and a network of public transportation providers partnering to assist eligible travelers.

The recommended project list is approved by the NC Board of Transportation. Following review, selected projects are notified. A grant agreement between the department and the recipient is prepared and executed. Expenses incurred in accordance with the Grant Agreement are reimbursed to the subrecipient once claims are submitted with appropriate documentation, are processed and approved for payment.

On NCDOT's confirmation Grant Master List (GML), the Traveler's Aid program disbursements are identified as follows:

- *State No: DOT-11*
- *WBS Description: xx-TA-xx (project number assigned to the grant)*

Brief Description of Program:

Funds are awarded through ‘Aid to County’ to Local Health Departments for the purpose of utilizing NC Regional Collaboratives to engage, screen and deliver the North Carolina Minority Diabetes Prevention Program (NC MDPP) that includes the CDC curricula “Prevent T2” and “Prevenga el T2” to a cohort of minority communities within its region. The goal of NC MDPP is to establish a statewide framework to decrease the incidence of diabetes in minority communities. NC MDPP is composed of three main components:

- (1) Community screenings for prediabetes and region-specific targeted marketing campaigns in minority communities promoting prediabetes and diabetes awareness;
- (2) 12-month NC MDPP Lifestyle Class Series in minority communities;
- (3) Community education, outreach and trusted messenger conversations on lifestyle and healthy living best practice behaviors to minority communities across North Carolina.

Brief Description of Program:

The Injury and Violence Prevention Branch (IVPB) mission is to promote and protect the health and well-being of all people in North Carolina by preventing injury and violence. In 2023 the Branch was awarded funding from the Centers for Disease Control and Prevention to implement the Overdose Data to Action in States (OD2A-S) cooperative agreement.

The purpose of this funding is to integrate an interdisciplinary and cohesive approach to advance and evaluate comprehensive state-level interventions for preventing prescription drug overuse, misuse, abuse, and overdose, as well as improve the timeliness of fatal and nonfatal opioid overdose surveillance. It builds on previous CDC funding opportunities: Prescription Drug Overdose Prevention for States and Enhanced State Surveillance of Opioid-Involved Morbidity and Mortality, and Overdose Data to Action. Interventions of priority address drivers of the prescription drug overdose epidemic, particularly the misuse and inappropriate prescribing of opioid pain relievers. Priorities include prevention strategies to improve safe prescribing practices and prevent prescription drug overuse, misuse, abuse, and overdose; as well increasing the timeliness and dissemination of fatal and nonfatal opioid overdose and associated risk factor reporting to key stakeholders. The priority strategies are:

1. Enhance and maximize a state PDMP (Prescription Drug Monitoring Program).
2. Implement community or insurer/health system interventions aimed at preventing prescription drug overdose and abuse.
3. Conduct policy evaluations.
4. Develop and implement Rapid Response Projects.
5. Increase the timeliness and dissemination of aggregate fatal and nonfatal opioid overdose and associated risk factor

NC OVERDOSE DATA TO ACTION PROGRAM

reporting.

Agencies Funded: Community based organizations, local health departments, and state universities.

Services Provided by Agencies: Federal Funds are to be used for opioid drug overdose prevention and surveillance.

Monitoring: Agencies participate on monthly calls; submit monthly expenditure reports; and mid-term and end of the contract year reports to report expenditures, activities and outcomes to the Program Supervisor.

Brief Description of Program:

North Carolina's Maternal Mortality Review Committee (MMRC) is comprised of 20 multidisciplinary members. The NC MMRC is funded by the Enhancing Reviews and Surveillance to Eliminate Maternal Mortality (ERASE MM) program out of the Centers for Disease Control and Prevention. The ERASE MM support states and jurisdictions to comprehensively review deaths that occur during or within a year of pregnancy (pregnancy-associated deaths) The MMRC will continue to review all maternal deaths through quarterly meetings. The MMRC will disseminate findings and recommendations to policy makers, health care providers, health care facilities, and the general public. The duties of NC's MMRC reviews includes gathering information to understand the drivers of maternal mortality, complications of pregnancy and associated disparities, as well as, how best to implement interventions that will have the most impact at the patient, provider, facility, system, and community levels; and disseminate findings and recommendations ranging from policy makers to the general public in a manner that is best understood.

Brief Description of Program:

Rural State Operating program funding assistance is used to supplement transportation system delivery of additional services current funding does not adequately support. Rural State Operating (RO) funds are available for Section 5311 recipients who fall into one of the following categories: Small Fixed Route, Regional, and Rural/Urban Consolidated systems identified in the Rural State Operating Overview and in the annual call for projects. Eligibility and eligibility requirements are discussed in Integrated Mobility Division's (IMD) procedures and the annual call for projects. General public transportation activities in rural North Carolina (areas outside urbanized area boundaries) are the focus of this funding. Eligible activities for this operating assistance are additional trips in the service area not covered by other funding sources. Trips are encouraged to be coordinated with human service agencies, near-by jurisdictions, and/or public and private transportation providers. IMD defines the eligible services and organizations in the annual call for projects.

On NCDOT's confirmation Grant Master List (GML), these funds are identified as DOT-11

Brief Description of Program:

The Urban Advanced Technology funding is used to benefit transit systems in North Carolina utilizing a wide selection of technologies, enhancing both the passenger experience as well as enabling transit systems to improve safety and efficiencies in their operations. The N.C. Department of Transportation Integrated Mobility Division encourages North Carolina's transit systems to employ advanced technologies fostering increased efficiencies throughout the state. Technology projects must meet the technology definition of "Software and hardware components of technology projects are associated with the technology focus areas." The specific focus area may change annually and will be identified in the Advanced Technology Application. A project's budget may include hardware, software, data communication costs and hosting fees for the first year and the initial training. *Contract administration, facility upgrades and custom reports are not eligible.

Brief Description of Program:

ConCPT Program funding consists of two (2) categories of: Consolidation and Coordination of Public Transportation (ConCPT) services.

Financial assistance is provided to public transportation providers to support the consolidation of two or more transit systems into a single transit system to maximize resources, gain efficiencies, and increase access to public transportation is categorically a Consolidation Grant. Eligible applicants must be subrecipients of Federal transit funds through the NCDOT Integrated Mobility Division or directly from the Federal Transit Administration. The ConCPT Consolidation funds are to be used for new consolidation projects. Eligibility and eligibility requirements are published in IMD's procedures and the annual call for projects. General public transportation activities in rural North Carolina (areas outside urbanized area boundaries) are the focus of this funding. ConCPT Consolidation funds must be directly applied to public transportation projects and cannot be used to offset local funding. The funds may be used for administrative and/or operating expenses. The application must clearly specify the use of funds. The consolidation requirements and amount of potential funding are described in the annual call for projects and the program application.

Financial assistance is provided to public transit systems to assist in coordinating trips between three or more transit systems for long-distance routes that run every weekday on a fixed route with a published schedule. The coordination efforts established with this program are designed to maximize resources, gain efficiencies, and improve access to public transportation. Routes should be planned and designed to provide access to major medical destinations and nearby regional and inter-city transportation facilities such as multi-modal centers and intercity bus stops. Services to other regional destinations such as community colleges should also be considered. Eligible applicants must be subrecipients of Federal transit funds through the NCDOT Integrated Mobility Division or directly from the Federal Transit Administration. To be eligible for ConCPT Coordination funds a lead transit system will apply on behalf of all the systems participating in the coordinated effort. Eligibility and eligibility requirements are published in IMD's procedures and the annual call for projects. General public transportation activities in rural North Carolina (areas outside urbanized area boundaries) are the focus of this funding. ConCPT Coordination funds must be directly applied to public transportation projects and cannot be used to offset local funding.

ConCPT Program

The funds may only be used for operating expenses and the application must clearly specify the use of funds in the application.

Brief Description of Program:

The Demonstration Grant is a grant using state funds for the bi-annual High Point International Home Furnishes Market. A contract for transportation services for the Market shall be secured through a collaborative process between the City of High Point and the Market Authority, in compliance with local, state, and federal guidelines, for execution by the City of High Point and the Contractor. The transportation services are provided by a third-party contractor.

The North Carolina General Assembly provides funding yearly for the furniture market for the purposes of providing transportation to the visitors. The Integrated Mobility Division has designated the City of High Point to be the recipient of the funds. According to the Memorandum of Agreement between the City of High Point and the Market Authority, the transportation provider will submit periodic invoices and documentation to the Market Authority and after approval by the City of High Point, the Market Authority will reimburse the contractor for the expenses incurred in accordance with the Grant Agreement. After the expenses have been paid to the contractor the City of High Point will submit a claim in EBS for reimbursement.

On NCDOT's confirmation Grant Master List (GML), the Demonstration Grant program disbursements are identified as State No: DOT-11

Brief Description of Program:

The Internship Apprenticeship Program funding provides transit systems financial assistance to extend work experience and learning opportunities for students currently enrolled in a university or college in North Carolina. The internship program strengthens the academic curriculums of participating schools and helps develop a pool of qualified individuals for the State's public transportation industry. The internship program also provides students an opportunity to use analytical and communication skills gained during their academic career in a public transportation setting. With hands-on training and experience, interns are better able to evaluate public transportation careers and compete for jobs.

On NCDOT's confirmation Grant Master List (GML), these funds are identified as DOT-11.

Brief Description of Program:

HHPD FY24 makes available federal funds to eligible states for pass through to non-Federal governmental organizations or nonprofit organizations for the rehabilitation of eligible high hazard potential dams that fail to meet minimum state dam safety standards and pose unacceptable risk to life and property. For the purposes of the HHPD Grant Program, rehabilitation means the repair, replacement, reconstruction, or removal of a dam to meet applicable state dam safety and security standards. The Fiscal Year 2024 Fall HHPD grant is available to support two categories of funding: (1) Project Scoping, Engineering and Design and (2) Construction Projects.

Brief Description of Program:

The North Carolina Partnership to Increase Colorectal Cancer Screening (NCPICCS) is a federally funded program provided through the Centers for Disease Control and Prevention (CDC). NCPICCS is required to partner with health systems to increase colorectal cancer screening rates in clinics. NCPICSS is a collaboration between the American Cancer Society (ACS), the University of North Carolina-Chapel Hill Lineberger Comprehensive Cancer Center (UNC) and the NC Cancer Prevention and Control Branch to implement evidence-based interventions (EBIs) and improve data quality to improve colorectal cancer (CRC) screening rates in clinic locations.

The programs are also required to assess current cancer burdens and health disparities and to assess the existing initiatives, capacity, coalitions/partnerships, and infrastructure in the State. In order to accomplish these objectives, the program must reach out to local and regional partners working on cancer issues.

Primary Program Activities include the following:

- Participation in quality improvement learning collaborative and training on evidence-based interventions.
- Collaboration with health systems to increase colorectal cancer screening rates.
- Promotion of partnerships and collaboration with agencies, health facilities and educational institutions to actively work toward the goals and objectives of the Cancer Branch.

NORTH CAROLINA PARTNERSHIP TO INCREASE COLORECTAL CANCER SCREENING (NCPICCS)

Agencies Funded: Community based organizations and federally qualified health centers.

Services Provided by Agencies: Implementation of evidence-based interventions to increase colorectal cancer screening rates.

Monitoring: Contractor must submit monthly expenditure reports for reimbursement. Contractors must adhere to stipulations specific within their contractual agreement. Federal mandates must be followed along with performance measures and scope of work agreed upon by both the entity and the State of North Carolina.

93.497	Family Violence Prevention & Services American Rescue Plan Act (ARPA) Sexual Assault Grant
Federal Program/Project:	Family Violence Prevention & Services Grant
Federal Authorization:	U.S. Department of Health and Human Services FVPSA American Rescue Plan Act (ARPA) Sexual Assault (93.497): American Rescue Plan Act of 2021 (P.L. 117-2).
	North Carolina Department of Administration NC Council for Women & Youth Involvement
<u>Agency Contact Person – Program</u>	<u>Agency Contact Person - Financial</u>
Danielle Carman Executive Director 984-236-0331	Elizabeth Moreno Manager 984-236-0082

Brief Description of Program:

The Family Violence Prevention and Services Program administers the Family Violence Prevention and Services Act (FVPSA), the primary federal funding stream dedicated to the support of emergency shelter and related assistance for victims of domestic violence and their children.

FVPSA Core is a primary federal grant funding stream for local domestic violence programs to provide core services, including crisis response, safe housing, advocacy, counseling, legal assistance, safety planning, and comprehensive support.

Specifically, FVPSA Core's statutory purposes per 42 U.S.C. § 10401(b) are to:

- (1) assist States and Indian tribes in efforts to increase public awareness about, and primary and secondary prevention of, family violence, domestic violence, and dating violence; and
- (2) assist States and Indian tribes in efforts to provide immediate shelter and supportive services for victims of family violence, domestic violence, or dating violence, and their dependents.

The federal cognizant agency is the U.S. Department of Health and Human Services Administration for Children and Families. The NC Council for Women and Youth Involvement applies for North Carolina's formula allocation through an annual application process.

The federal funds are allocated to sub-grant recipients (non-profit and governmental entities) based on a funding formula that assesses population data, number of people served, and fiscal and programmatic grant compliance. The award process includes a

Family Violence Prevention & Services Grant

grant application review and compliance assessment prior to formal award notification being sent to sub-grant recipients.

Funds are disbursed based on a reimbursement process once each sub-grant recipient completes and enters into a contract agreement with the NC Council for Women and Youth Involvement. The two-year contract period runs from October 1st through September 30th.

All grant awards are contingent upon the NC Council for Women and Youth Involvement receiving the specified grant funds from the U.S. Department of Health and Human Services. Eligible applicants that become grantees are required to submit monthly reimbursement reports and semi-annual statistical reports that provide accountability for the Family Violence Prevention and Services Act funds.

Use of funds is covered by 42 U.S.C. § 10408(b):

(1) Funds awarded to eligible entities under subsection (a) shall be used to provide shelter, supportive services, or prevention services to adult and youth victims of family violence, domestic violence, or dating violence, and their dependents, which may include—

(A) provision, on a regular basis, of immediate shelter and related supportive services to adult and youth victims of family violence, domestic violence, or dating violence, and their dependents, including paying for the operating and administrative expenses of the facilities for such shelter;

(B) assistance in developing safety plans, and supporting efforts of victims of family violence, domestic violence, or dating violence to make decisions related to their ongoing safety and well-being;

(C) provision of individual and group counseling, peer support groups, and referral to community-based services to assist family violence, domestic violence, and dating violence victims, and their dependents, in recovering from the effects of the violence;

(D) provision of services, training, technical assistance, and outreach to increase awareness of family violence, domestic violence, and dating violence and increase the accessibility of family violence, domestic violence, and dating violence services;

(E) provision of culturally and linguistically appropriate services;

(F) provision of services for children exposed to family violence, domestic violence, or dating violence, including age-appropriate counseling, supportive services, and services for the non-abusing parent that support that parent's role as a caregiver, which may, as appropriate, include services that work with the non-abusing parent and child together;

(G) provision of advocacy, case management services, and information and referral services, concerning issues related to family violence, domestic violence, or dating violence intervention and prevention, including—

(i) assistance in accessing related Federal and State financial assistance programs;

- (ii) legal advocacy to assist victims and their dependents;
- (iii) medical advocacy, including provision of referrals for appropriate health care services (including mental health, alcohol, and drug abuse treatment), but which shall not include reimbursement for any health care services;
- (iv) assistance locating and securing safe and affordable permanent housing and homelessness prevention services;
- (v) provision of transportation, childcare, respite care, job training and employment services, financial literacy services and education, financial planning, and related economic empowerment services; and
- (vi) parenting and other educational services for victims and their dependents; and

(H) prevention services, including outreach to underserved populations.

Grant funds provided under FVPSA cannot be used for direct payments to any client/victim or dependent of a client/victim. Federal funds made available to a State or Indian tribe under this program shall be used to supplement and not supplant other Federal, State, tribal, and local public funds expended to provide services and activities that promote the objectives of this program.

With the passage of ARPA, FVPSA received an historic investment for rape crisis centers and sexual assault programs to support sexual assault survivors impacted by COVID-19. The purposes of ARPA Sexual Assault grants are: 1) to assist with the transition to virtual services for rape crisis centers and sexual assault programs that provide crisis and support services and assistance to sexual assault survivors; and 2) to support the increased emergency needs of sexual assault survivors because of COVID-19. These grants provide flexibility in how recipients use the funding to support a range of activities, including but not limited to counseling, mobile advocacy, telehealth, teletherapy, peer support, temporary housing, rental assistance, supplies, equipment, and software.
