(42 U.S.C. Section 701 (a) (1))
II. PROGRAM PROCEDURES

The Secretary of the Department of Health and Human Services (federal DHHS) allocates funds to a state in accordance with a pre-defined formula, upon submission of an application by a State and approval of that application. The application must include a needs assessment that shall identify the need for preventive and primary care services for pregnant women, mothers, and infants up to age one, and children, and services for children with special health care needs. The needs assessment must be conducted and updated every 5 years. (42 U.S.C. Section 705 (a) (1))

The application must also include a State plan for meeting the needs identified by the statewide needs assessment and must include (1) a statement of the goals and objectives, which must be consistent with the objectives of the program, for meeting the needs specified in the needs assessment; (2) an identification of the areas and localities in the State where services are to be provided and coordinated; (3) an identification of the types of services to be provided and the categories or characteristics of individuals to be served; and (4) information the State will collect in order to prepare required reports. The plan must be updated annually. (42 U.S.C. Section 705 (a) (2))

The State Plan for the Maternal and Child Health Block Grant is approved by the North Carolina General Assembly, and executed by the Division of Public Health on a State fiscal year basis.

Funds for this program are from a combination of Maternal and Child Health Block Grant funds and matching State funds. The proportion is four federal dollars and three State dollars for every seven dollars awarded and expended. The subrecipient has no requirement to account separately for federal and State dollars in its budget and expenditures. Federal funds are drawn by the State to meet the required match upon total expenditures reported.

In this program funds are allocated to Adolescent Pregnancy Prevention Campaign of North Carolina to provide consultation, technical assistance, and resource delivery relating to prevention of adolescent pregnancies to teen pregnancy prevention councils and projects across the State of North Carolina. The agency will also be involved in resource development with its lending library of books, journals, and curricula – as well as compile and distribute relevant data and provide training and public education that contributes to the reduction of adolescent pregnancies. They will provide data and other pertinent information to local citizens interested in teen pregnancy prevention issues. Increased awareness and education will be measured through evaluations implemented for the following training events: Teen Parent Network, Hispanic Outreach Network, and Local Roundtable training events.

The Maternal and Child Health Block Grant is administered by the North Carolina Department of Health and Human Services, Division of Public Health, Women’s and Children’s Health Section, 1928 Mail Service Center, Raleigh, NC 27699-1928.
